

Day Drilling Supervisor

Description:

If you are selected as the Drilling Supervisor, you will be responsible for providing onsite supervision of development drilling operations for Manan/Client. This position will safely and efficiently manage rig site operations and personnel to deliver the business objectives. This position will also act as the Manan/Client safety leader for wellsite location and operations.

This is a rotational position that requires travel to and from home to the work site.

This is a Safety Sensitive position.

Responsibilities may include but not limited to:

- * Be a safety leader and define the HSE tone and expectations for the location
- * Lead all operations in a manner that ensures the health and safety of all personnel and the protection of the environment
- * Lead all pre-tour safety meetings and participate in all 3rd party safety meetings and JSA discussions
- * Responsible for the onsite participation and implementation of all safety policies and programs
- * Maintain proper well control certification and be capable of managing well control situations
- * Identify/assess HSE and operational risks and develop contingency plans to mitigate same
- * Ensure work plans are communicated to and understood by all affected personnel
- * Ensure operations align with all statutory, policy and program requirements
- * Ensure all regulatory approvals are in place prior to any operation
- * Continuously identify ways to reduce cost and improve work program effectiveness without sacrificing quality, production rates or reserves
- * Communicate daily with Drilling Engineer to continuously improve well planning and execution
- * Maintain direct and timely communication with the Field Drilling Superintendent/Drilling Superintendent
- * Investigate, follow up and ensure all incidents relating to rig site personnel, equipment and procedures are closed out
- * Monitor, evaluate and regularly report on overall performance against program and performance of the services and equipment involved in the operation
- * Ensure all daily Wellview/Openwells reports are submitted on time and information is complete and accurate
- * Coordinate, supervise, and critique service company activities; Report opportunities for improvement and significant achievements that are specific to service company performance
- * Review and recommend optimization of drilling program/procedures
- * Maintain logistics plan and communications for equipment, personnel, and services
- * Maintain working knowledge of Manan/Client's Standards and Recommended Practices and conduct work accordingly

Basic/Required:

- * Must be legally authorized to work in the India on a full-time basis for anyone other than current employer
- * Current/Valid Driver's License
- * Valid IADC Well Control Certification
- * 10+ years of experience in Drilling onsite supervision
- * Intermediate level of proficiency with conducting visible HSE Leadership
- * Willing and able (with or without a reasonable accommodation) to work a rotational on-call schedule

Preferred:

- * 10+ years of experience in the oil and gas industry
- * Knowledge of well reporting software (WellView/Openwells)
- * Well-developed project management skills and the ability to coordinate multiple projects concurrently
- * Ability to prioritize in a multi-faceted work environment
- * Excellent interpersonal and organizational skills
- * Demonstrated strong networking and communication skills
- * Actively communicates and takes time to safely perform work to protect our people and environment
- * Demonstrates a strong commitment to delivering results while maintaining a safe environment
- * Delivers results through realistic planning to accomplish goals
- * Takes ownership of actions and follows through on commitments by holding others accountable and standing up for what's right
- * Drives thoughtful and pragmatic change, encourages innovative thinking and continuous improvement, and models adaptability through resourcefulness, flexibility and positivity
